CHANGE APPLICATION INFORMATION

A water right owner who wants to make a change to an existing water right must submit an application to the DNRC. The proposed change cannot create an adverse affect to other existing users who hold water rights that may have an earlier (senior) or later (junior) priority date than the Applicant's. If the application for change is granted, the Applicant's water right will retain its priority date.

A water right is valid if water was actually put to use historically. The water right is limited to the extent of that historical use. A water right cannot exist if it was never used, even if the water right is described on paper.

The information provided to the questions below is required for the Department to begin processing the application. The Department may require additional information during the processing of the application. For any questions, please contact a Water Resources Division Regional Office.

NIR.2 MAP – ARM 36.12.111

Maps depicting the historic and proposed water system are required. Aerial photos may be available from the DNRC, NRIS, NRCS, USGS, and on the Internet and may be available from the 1940s up until today.

NIR.2.A ☐ Note the section corners, township, range, and add a north arrow to the map for all maps submitted.

NIR.2.B ☐ Historic Use - for each water right being changed, provide a map depicting the historic point(s) of diversion, means of conveyance, place of use, and place of storage. Be sure to identify the water right number on each map.

NIR.2.C ☐ Historic Use - if you measure water near the historical point of diversion or place of use, please identify where the measurement occurs.

NIR.2.D ☐ Proposed Use - provide a map which clearly identifies the proposed point(s) of diversion, place of use, and place of storage. For partial changes, the map should reflect the entire water right including the proposed change and the remaining historic use.

NIR.3 HISTORIC USE - ARM 36.12.1902

For the questions below, describe the historic use of the water right or the current use if a change authorization was previously granted on the water right. The description of the historic use depends on the type of water right being changed. Historic use for a Statement of Claim or for an exempt non-filed right must be described as it was used prior to July 1, 1973. Historic use for provisional permits and certificates of water right must be described as was used at the filing date of the completion notice.

The historic consumptive use is the amount of water that was diverted from the source minus the amount of water that returns to a water source.

The Department will calculate the diverted volume and the consumptive volume.

Complete the following information for each water right being changed.

NIR.3.A ☐ Attach a description of how the system operated from the point of diversion through the place of use. Include a description of wastewater collection and treatment used, if any. Please label attachment **NIR.3.A Historic Use**.
